It seem British Seagull made lots of 'odd batches' of motors, I have heard the same of the magneto FP being sold in the 1980s, long after Magnetos were replaced with CD ignitions. It seems a batch of CD Ignition 102's were made and exported to Australia, which is how Hugo got his, however as normal British Seagull made a few extra to sell 'at the gate'.

[Saving Old Seagulls Free British Seagull information](#) ...  
British Seagull started in 1931 and amazingly enough it's still going strong and in British hands - almost unique! For its time the original engine was very advanced, a good proportion of the original engines are still running and parts are generally still available to keep them that way - a truly unique engine, a magnificent piece of British engineering and ingenuity.

[British Seagull Outboard Motors](#)  
Terns are small to medium birds, often smaller and slimmer than most of the gulls. All are migratory, often seen outside their breeding areas in spring and autumn, but absent from Europe in winter. There are two main groups, the (sea) terns (not always strictly marine), which look pale grey and white except for a black cap in summer, have long tail streamers and dive to catch fish, and the (marsh terns), which are blunt-tailed, almost black underneath in summer, and dip to pick their ...

[British Seagull Outboard Motors](#)  
The British Seagull® was a British manufacturer of two-stroke outboard engines in Poole, Dorset from the early 1930s until the mid-1990s. Although their "Classic" engines were for decades an exemplar of rugged simplicity and reliability, the company eventually failed when customer tastes changed and as tighter emissions regulations took effect. Production of complete engines stopped in 1996, and another company bought the rights to the brand in 1999. Spare parts continue to be produced for ...
