Basic Measurement Most engineering surveys are carried out in small areas. The reference surface may be taken tangent plane to the geoid, fig. For areas < 10 KM² Principle of plane survey is applied and curvature is neglected. Knowing that for 200 KM² , the difference between the sum of the spherical angles and the plane angles would = 1". Difference of 20 km Arc to its chord length is about 8mm. Above assumption is true for positional applications but not elevations. Cause geoid deviate ...
