~~Vertical greenery can act as a stress buffer, NTU Singapore study finds~~

Vertical greenery 'planted' on the exterior of buildings may help to buffer people against stress, a new study has found.

This book is the result of a symposium on "Design and Aesthetics in Wood," which was held at the State University of New York College of Environmental Science and Forestry in Syracuse, N.Y., 7-9 November 1967. Concurrent with the conference was an exhibition, sponsored by the College of Environmental Science and Forestry and the School of Art, in which the art objects and industrial products illustrated here were a part.

Oehlert's text is suitable for either a service course for non-statistics graduate students or for statistics majors. Unlike most texts for the one-term grad/upper level course on experimental design, Oehlert's new book offers a superb balance of both analysis and design, presenting three practical themes to students: □ when to use various designs □ how to analyze the results □ how to recognize various design options Also, unlike other older texts, the book is fully oriented toward the use of statistical software in analyzing experiments.
