The 125-horsepower* Rotax 600R E-TEC engine incorporates second generation E-TEC technology from its big brother twin 850 E-TEC 2-stroke. It offers more responsive, dynamic performance and 5 more HP than its predecessor – all while keeping its reputation for leading reliability and fuel and oil usage.

Rotax Snowmobile Engine and motor: 2 stroke and 4 stroke ...
A rotary engine is an internal combustion engine, like the engine in your car, but it works in a completely different way than the conventional piston engine. In a piston engine, the same volume of space (the cylinder) alternately does four different jobs -- intake, compression, combustion and exhaust.

How Rotary Engines Work | HowStuffWorks
Specifications: Wheels: Front 3.25 x 19in, Rear 4.00 x 18in. Carburation: two-stage, two-barrel 18-32 mm Mikuni. Fuel: 85-95 octane. Starting system: Electric, kickstart (the latter intended to be offered only as an option). Performance: Top Speed (tested): 168 km/h (104 mph). Standing ¼ mile: 14.02 ...

Suzuki RE5 - Wikipedia
At 528cc, the 35 hp OMC Wankel was the first rotary engine developed specifically for snowmobiling, the most powerful rotary to go into a snow sled at the time and the first production rotary to be built in North America. Yet it was essentially the same size and weight as the very popular but considerably less powerful Sachs 303 Wankel.

Flashback: The 1973 Evinrude Trailblazer | SnowGoer
The Mazda RX-7 (????????????????), Aruekkusu Sebun) is a front/mid-engine, rear-wheel-drive, rotary engine-powered sports car that was manufactured and marketed by Mazda from 1978 to 2002 across three generations, all of which made use of a compact, lightweight Wankel rotary engine. The first generation of the RX-7, SA, was a two-seater 2 door hatchback coupé.

Mazda RX-7 - Wikipedia
The roughly 2-liter engine is force-fed 10 psi of boost and makes 300 hp in stock form. While the builder gives us minimal information on the engine build, a few things are obvious from the photos. It appears that a single, large-diameter turbo has likely replaced the original twin-turbo setup and a large-diameter, stainless steel exhaust has been fitted.

20B Rotary-Powered Superlite SL-C | Rare Car Network
ENGINE SPECS: Model: Sachs Wankel KM24 rotary engine, serial number #7566914. This is the 23hp 295cc version. This is the 23hp 295cc version. IGNITION : Engine is currently set-up running a single "bosch" points ignition with external coil.

Sell NICE 23hp Sachs-Wankel KM24 Rotary Engine Ultralight ...
The Mazda RX-8 was a sports car manufactured by Japanese automobile manufacturer Mazda between 2002 and 2012. It was first shown in 2001 at the North American International Auto Show.It is the successor to the RX-7 and, like its predecessors in the RX range, it is powered by a rotary Wankel engine.The RX-8 was available for sale in North America from the 2003 model year.

Mazda RX-8 - Wikipedia
Verner Motor is a world leader in the design and manufacturing radial engines for all kind of small aircraft. We develop and produce drive systems for aircraft in the industry including LSA, microlight, ultralight, PPG, powered parachute, trike, historical replica. Passion.

Verner Motor - Home
Rotary Basics Both the piston engine and the rotary engine have a space in which a fuel/air mixture is inhaled, compressed and set afire, and exhaled. The piston engine does it by moving the piston up and down within the same space, drawing in the fuel/air mixture, compressing and igniting it then pushing the exhaust gases out.

13B Engine Specs | It Still Runs
Le Rhône 14D. (1912) A 120 hp (89 kW) two-row rotary, consisting of two seven-cylinder rows rotating round a single two-throw crankshaft. Le Rhône 18E (1912) (1912) A 160 hp (120 kW) two-row rotary, consisting of two nine-cylinder rows rotating round a single two-throw crankshaft.
