The Filter Bubble, then, becomes an important part of the debate about the future of the Internet that faces new issues and challenges such as cyberwarfare, net neutrality and — thanks to Nicholas Carr — whether or not Google is making us dumber.

Review: The Filter Bubble: What the Internet Is Hiding ...

Drawing on interviews with both cyber-skeptics and cyber-optimists, from the co-founder of OK Cupid, an algorithmically-driven dating website, to one of the chief visionaries of U.S. information warfare, THE FILTER BUBBLE tells the story of how the Internet, a medium built around the open flow of ideas, is closing in on itself under the pressure of commerce and "monetization." It peeks behind the curtain at the server farms, algorithms, and geeky entrepreneurs that have given us this new ...

The Filter Bubble: How the New Personalized Web Is ...

The term filter bubble was coined by internet activist Eli Pariser in his book, "The Filter Bubble: What the Internet Is Hiding From You" (2011). Pariser relates a case in which a user searches for "BP" on Google and gets investment news regarding British Petroleum as the search result, while another user receives details on the Deepwater Horizon oil spill for the same keyword.

With vivid detail and remarkable scope, The Filter Bubble reveals how personalization undermines the Internet's original purpose as an open platform for the spread of ideas and could leave us all in an isolated, echoing world. Customers Who Bought This Item Also Bought You Are Not a Gadget: A Manifesto

The Filter Bubble: What the Internet Is Hiding from You by ...

The Internet giants use our personal data – the products we have searched, the political trends we see or the websites we consume – to adjust our browsing. In this way, the bubble filter is the result of a personalized search for which past clicks, search history or geographical location of the user have been taken into account. In this way, two phenomena occur: on the one hand, we move away from that information with which we do not sympathize or that does not match our views and ...

What is the Internet and how does the "filter bubble" work ...

Introduced by tech entrepreneur and activist Eli Pariser in 2011, the 'filter bubble' is a persistent concept which suggests that search engines and social media, together with their recommendation and personalisation algorithms, are centrally culpable for the societal and ideological polarisation experienced in many countries: we no longer encounter a balanced and healthy information diet, but only see information that targets our established interests and reinforces our existing worldviews.

Filter bubble | Internet Policy Review

The Filter Bubble, by Eli Pariser, puts forth an argument that we're increasingly trapped inside an algorithm that filters our news based on what it thinks is best for us. In this case, IT is an algorithm. Computers and the algorithms they run are increasingly aware of the things we seem to like.
