advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada.

Kind of Calculator Can I Use? Your calculator should be, at the minimum, a scientific calculator. It can be programmable or non-programmable. Bear in mind, however, that for perhaps 60 percent of the test items, the calculator will afford you no advantage and, moreover, may actually work against you. No pocket organizers, hand-held minicomputers, paper tape, or noisy calculators may be used. In addition, no calculator requiring an external power source will be allowed. Finally, no sharing of calculators will be permitted - you must bring your own. Make sure you are thoroughly familiar with the operation of your calculator before the test. Your performance on the test could suffer if you spend too much time searching for the correct function on your calculator.
